

PRESS RELEASE

DAJIN COMPLETES AIRBORNE SURVEY ON SPANISH MOUNTAIN REGION

Vancouver, BC – **July 10, 2007** – Dajin Resources Corp. (“Dajin”) (TSX: **DJI-V**) reports the completion of an airborne survey by Aeroquest Limited over Dajin’s 100% owned Addie 1 claims in the Spanish Mountain region, located adjacent to and east of the Skygold Ventures Ltd.(SKV-V)/ Wildrose Resources Ltd.(WRS-V) sediment hosted bulk tonnage gold discovery in the Cariboo Mining District of British Columbia, where a previous airborne survey in 2006 indicated a southeast/northwest trend. A 725 line kilometre magnetic survey was flown over the Spanish Mountain region using Aeroquest’s Aero TEM II system which provides both time domain electromagnetic and aeromagnetic coverage. The final interpretation of data, which is expected in approximately six weeks, will assist Dajin in mapping the geology underlying till covered regions and permit targeting the most permissive portions of the claims for follow up exploration programs.

A second airborne survey covering 655 line kilometres is scheduled to be flown in three weeks by Aeroquest over Dajin’s 100% owned Addie 2 claims in the Eureka Peak region in the Cariboo Mining District. These claims are located west of the 18 mineral claims that Hawthorne Gold Ltd. (HGC-V) recently entered into an option agreement with Dajin to acquire a 70% interest.

Dajin Resources Corp. holds a 100% interest in 28 mineral claims in the Spanish Mountain region, a 100% interest in 20 mineral claims in the Eureka Peak region, where an extensive soil sampling program is currently underway and holds a joint venture agreement with Cariboo Rose Resources Ltd. whereby Dajin has the right to earn a 65% interest in 32 mineral claims in the Horsefly region in the Cariboo Mining District in south central British Columbia.

In the Nelson Mining District Dajin holds a 100% interest in 27 mineral claims in the Ymir region, 35 kilometres northeast of the Trail smelter, where an extensive soil sampling and trenching program is currently underway in preparation for drilling later in the year.
